

DKT International- 2023 Results

Dear Friend of DKT,

We are pleased to share our 2023 CYP and sales results.

DKT delivered more than 64.1 million Couple Years of Protection (CYPs) last year, delivering significant health impact at scale across more than 90 countries. We expanded both geographically and programmatically in 2023, to geographies ranging from Congo Brazzaville and Iraq, to Honduras and Guinea-Bissau. Teams launched new products, introduced creative and dynamic behavior change campaigns, and worked towards greater financial sustainability. We continue to be one of the largest providers of contraception and safe abortion products, services, and technology in the world.

In the spirit of transparency and communication, DKT lists out all the products we sell by product type and country. A summary of this is provided below and a detailed list can be found on our website [here](#). We have also published more than 30 years worth of DKT sales data in the Contraceptive Social Marketing statistics, which can also be found [on our website](#).

We take this opportunity to thank the many partners, colleagues, donors, and DKT team members who made these results possible.

DKT International remains energized and focused on our mission to ensure that all children are wanted.
